

BANCO CENTRAL DO BRASIL – FOCUS

May 25, 2001

Median of market expectations for the GDP growth remained stable at 4.00% for year 2001 and declined to 4.00% from 4.20% for year 2002, as tracked by Banco Central do Brasil daily survey. Forecasts for the consumer price index IPCA remained unchanged at 0.40% and at 0.45% for May and for June, 2001, respectively, and rose to 5.02% from 5.00% for 2001. Expectations for the IPC-Fipe increased to 5.00% from 4.90% for 2001 and remained stable at 3.50% for year 2002. Forecasts for the IGP-DI increased to 6.61% from 6.50% for 2001. Median of market expectations for the trade balance remained stable at a deficit of US\$1.50 billion for year 2001. Expectations for the current account deficit remained unchanged at US\$27.00 billion and at US\$27.05 billion for 2001 and for 2002, respectively. Median of market expectations for the Over-Selic remained stable at 16.00% for year 2001 and declined to 14.06% from 14.12% for year 2002. Forecasts for the exchange rate increased to R\$/US\$2.17 from R\$/US\$2.15 for 2001. On the fiscal side, market participants continue expecting a primary surplus of 3.00% of GDP for 2001, while a nominal deficit was revised to 4.20% from 3.95% of GDP for 2001. Expectations for other economic indicators, along with median expectations for the Top 5 forecasters are quoted in the tables and figures below.

GDP	3.80	3.00	4.50	4.10

Explanatory Note

Top 5 median expectations indices are calculated from the full sample based on the five institutions with minima penalty scores, calculated from observations on the institution's degree of forecast precision over the last four months. Each inflation figure that is released creates two penalty scores for each institution, that are the quadratic errors of the forecasts that the institution informed two and one day before the release of the actual figure. If the institution did not inform any value for those days, it receives the penalty of the worst performer in the sample for the period. The monthly penalty is calculated according to the formula below.

$$monthlypenalty = \frac{(100 \cdot (E[\pi_t | t-2] - \pi_t))^2 + (100 \cdot (E[\pi_t | t-1] - \pi_t))^2}{1000}$$

where π denotes inflation in percentage points.
